

Resources and Documentation

Visit www.bksv.com/downloads to find resources for HBK 2755.

User Manual

To download the user manual, do one of the following:

- Visit www.bksv.com/2755-manuals
- Scan the QR Code® (here or on the amplifier)
- Visit www.bksv.com and navigate to **Support > Downloads > HBK 2755 Power Amplifier Downloads**

Compliance and Regulatory Information

HBK 2755 Regulatory Labels

Government-required information is provided through one of the following:

- A physical label attached to the amplifier or shipping box
- An electronic label (e-label) in the amplifier's firmware

Regulatory Requirements and Markings

For information about the conformity icons on HBK equipment:

1. Visit: www.bksv.com/Quality-and-environment.
2. Click on **Regulatory requirements and markings**.

Legal Notices

Visit www.bksv.com/Legal-notice for trademark information, copyright information, as well as a link to all standard terms and conditions.

Recycling + WEEE

HBK has met its national obligations to the EU WEEE Directive by registering in those countries to which HBK is an importer. HBK has also elected to join WEEE Compliance Schemes in some countries to help manage customer returns at products' end-of-life. If you have purchased HBK-branded electrical or electronic products in the EU and are intending to discard these products at the end of their useful life, please do not dispose of them with your other household or municipal waste. HBK has labelled its branded electronic products with the WEEE Symbol to alert our customers that products bearing this label should not be disposed of in a landfill or with municipal or household waste in the EU. Instead, please be aware that HBK is making a return and collection system available to you, free of transportation and recycling costs, for discarding these products.

Safety Information

DANGER: Plastic bags can be dangerous. Keep plastic bags away from babies and children to avoid danger of suffocation.

NOTICE: Before using your amplifier, carefully read the operating and safety instructions applicable to you. In particular (but not exclusively) mind the following:

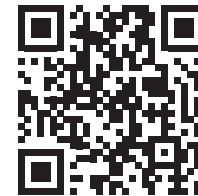

- Always operate the amplifier using a power cord with earth that is connected to electrical safety earth.
- Check the proper voltage at the back of the amplifier before connecting it to an AC power outlet.
- Your amplifier is extremely powerful and can cause hearing damage and damage to loudspeakers if not operated properly. Loudspeakers can easily be damaged or destroyed by applying too much power. Always check the loudspeaker's continuous and peak power capabilities. Also, accidentally turning up the volume can harm your hearing if you are not wearing ear protection.
